

Senior Architectural Designer

THW Design is seeking a dedicated, passionate team member for immediate opportunities as a **Senior Architectural Designer** to participate in all facets of our Senior Living projects.

The successful candidate will be self-motivated, organized, and well-rounded with a solid understanding of technical details, space planning and programming and how these principles inform design. The candidate must possess a strong work ethic and look to engage firm Principals, Project Managers, Project Architects and Staff in the generation of project concepts through their execution. The Senior Architectural Designer will participate in project interviews and concept presentations to Clients and lead in-house design reviews. The ideal candidate will have excellent graphic communication skills (sketching and Revit required) and significant experience in all aspects of traditional architectural project delivery [SD, DD, CD & CA].

The position requires performance of in aspects of design as it relates to individually assigned projects. This is inclusive of, but not limited to, the following:

- Must be comfortable working in a team-oriented, creative, collaborative environment spending time working with other architectural designers while leading space planning, rendering and presentation graphics efforts
- An understanding of the programmatic and space-planning requirements of Senior Living project typologies
- The ability to organize and execute work based on the priorities and schedules of multiple project teams.
- Knowledge and competency in software packages including current versions of Revit, Adobe Suite (Illustrator, InDesign, Photoshop, etc.), Google SketchUp, Microsoft Office, etc.
- Possess an understanding of three-dimensional forms and models.
- Multi-tasking/ability to participate in several capacities or projects simultaneously, each in different phases
- Initiative and willingness to be responsible for specific tasks
- Focus, efficiency and dependability; willingness to assist when needed
- Enthusiasm and eagerness for continued education and development of new skills

Qualifications:

- Minimum of 15 years of experience in Senior Living (related market experience in hospitality, mixed-use and/or multi-family residential will also be considered)
- Architectural Degree from an accredited College or University
- Professional experience in an Architectural design office and experience using 3D modeling as a design tool
- Authorized to work in the United States

Company Profile:

Headquartered in Atlanta, THW Design is a sixty-five-person multi-disciplinary firm with Architectural, Interior Design and Land Planning studios. Seamlessly combining these studios, the firm provides award winning projects through consistent, meaningful design. THW is considered among the nation's top

senior living and healthcare design firms with a unique approach to projects that foregrounds the resident experience through hospitality and community.

At THW, you'll find a diverse, collegial group of professionals that share a common compassion for those that live and work in the communities we design.
